Experience

KFin Technologies Limited

Apr 2024 – Present

Software Engineer — Java Full Stack Developer

- Developed and maintained **4+ enterprise-scale applications** using **Java, Spring Boot, React.js, and PostgreSQL**, supporting high-availability production systems.
- Designed and optimized **RESTful APIs** using Spring Boot and JPA, improving **P95 response times by 20–30%** through query optimization and index tuning.
- Implemented **Spring Security with JWT-based authentication and RBAC**, securing APIs for enterprise workflows.
- Collaborated with frontend teams to design clean API contracts, enabling efficient data flow and predictable UI rendering.
- Built **streaming-based data export services** for large datasets, reducing peak memory usage by **30%** and preventing performance degradation during peak load.
- Improved production observability through structured logging, centralized exception handling, and request tracing, reducing MTTR by **25%**.
- Owned backend modules end-to-end including requirement analysis, implementation, testing, deployment, and post-release monitoring within a **4-member engineering team**.
- Awarded the **Team Skill & Will Award** for consistent delivery, technical ownership, and cross-team collaboration.

Technical Skills

Frontend: React.js, TypeScript, Redux Toolkit, HTML5, CSS3

Backend: Java 11/17, Spring Boot, Spring Security, JPA, Hibernate, REST APIs

Databases & Infra: PostgreSQL, MongoDB, Redis

System Design: API Design, RBAC, Caching, Rate Limiting, Async Processing

Tools: Docker, Git, GitHub Actions, CI/CD, Postman, Kafka

Projects

Enterprise Project Planner — React.js, Spring Boot, PostgreSQL

- Built a full-stack project planning system supporting projects, tasks, subtasks, and role-based access control.
- Designed REST APIs using Spring Boot to manage project workflows with secure role-based authorization.
- Integrated frontend dashboards with backend services to provide real-time progress tracking and status updates.

API Gateway with Rate Limiting — Java, Spring Boot, Redis

- Implemented an API gateway with per-route and per-client rate limiting using Redis-backed counters.
- Handled **14K+ requests/sec** with stable latency while protecting downstream services from overload.

Education

Lakshmi Narain College of Technology University

Sep 2022 – July 2024

Master of Computer Applications (MCA), Bhopal, Madhya Pradesh

Bundelkhand University

June 2017 – August 2020

Bachelor of Science (Hons.) in Computer Science, Jhansi, Uttar Pradesh
